# RAIN INTERFERES WITH TENNIS MEET

By Hal Reynolds.

Rain blotted in and took a hand in the Spring Tennis League at the University of Chicago.

In the men's singles but two matches were played, while the doubles were started well on their way by two matches being completed and quite a number of defaults, much to the regret of those in charge of the tournament.

In the singles Ed Carter easily displaced of young Hardy Hall in straight sets, 6-0, 6-1. Hall appeared to be a little over-anxious during the first part of the match, making many out-of-court shots, and also having difficul-

The Ramspeck-Smith match, which went to the former by scores of 6-2, 6-2, was a great deal closer than the scores would indicate. A great number of the games went into deuce and were only won by Ramspeck's fine work at driving and placing. Smith played a net game when possible, his smashes netting him a good many points.

Tupper and McMillan in easy style 6-2, 6-1, neither exerting himself very much. Tupper and McMillan, considering their ages, put up a nice game against the veterans, making some nice shots and plays on hard-hit balls. One of the three games which the youngsters won, by the way, was a love one.

The matches which were scheduled for yesterday afternoon and not played will take place this afternoon promptly at 2:30 o'clock.

**MEN'S SINGLES.**  
Second Round.  
E. V. Carter, Jr., defeated H. Hall, 6-0, 4-2.  
C. M. Ramspeck defeated E. Smith, 6-2, 6-2.

**MEN'S DOUBLES.**  
First Round.  
Hallman and Hall defeated Starr and Cline, 6-1, 6-2.  
Black and Owens defeated Thornton and partner by default.

Ramspeck and Orr won by default.  
Scott and Ramspeck defeated P.  
rish and R. Y. Smith by default.  
Grant and Carter defeated Hall  
partner by default.  
Mansfield and Smith defeated T.  
per and McMillan, 6-1, 6-1.

**REFUSE TO REINSTATE  
DISCHARGED POLICEMEN**

men, Alfred J. Bender and J. C. Askew who were dismissed from the police force some weeks ago, to be reinstated was declined by the police board at its monthly meeting last night.

Attorney J. Y. Smith appeared for Mr. Askew as well as his family physician, Dr. Newman, but they failed to convince the police board that the man should be taken back. Both men were discharged on a charge of being

COTTON HELD IN  
TIGHT SESSION

Market Was Active, But Excitement Had Subsidied. Close Was Steady, One Point Lower to 4 Higher.

New York, September 3.—The cotton market was active again today, but showed less excitement while the action of prices suggested rather a reactionary sentiment after the big advance and in view of improved weather reports. October contracts, 9 1/2 per cent above the low level on Saturday on an early advance, and within 6 points of the high reached last week's bull market, but subsequent fluctuations were irregular, with the market trading off from the heat and closing steady net 1 point lower to 4 points higher.

Unexpected strength in the Liverpool market was attributed by private cables to heavy American and continental buying, and to the absence of any active hedge selling from western sources. The local market showed firm at an advance of 1/2 point in response to the English showing, which carried the active months up to 10 points above the level of last Wednesday. Realizing was very heavy at the advance, while there was also considerable reaction, but offerings were well taken on a reaction, and the market firm again during the middle of the day, on a reaction, followed by a report and covering by recent sellers.

Active months were followed by a decline in the market, but the decline was not as sharp as it appeared. The afternoon decline carried prices 4 to 8 points net lower, or a shade under the 10-cent level for December contracts, but was followed by a rally of 1 or 2 points on covering in the last minutes.

Spot cotton steady, middling uplands, 12 1/2; mid, 12 1/2; sales, none.

## COTTON FUTURES MARKETS.

Shows the Corn Crop Will Be About 650,000,000 Bushels Short.

Washington, September 3.—Hot weather and drought have played havoc with the nation's corn crop, causing a loss of 41,000,000 bushels, according to the government's monthly grain report issued today. Since first estimates of the outcome for corn this year were made, the weather has been a decline in condition amounting to 46,000,000 bushels and from indications of the crop condition on September 1 the harvest will be 2,510,000,000 bushels.

An increase in the estimate of the spring wheat crop places that at least 100,000,000 bushels less than the crop of last year. The combined crop of winter and spring wheat of the country 75,000,000 bushels the greatest wheat crop ever produced, exceeding the record crop of 1901 by 6,000,000 bushels.

The report follows: Corn—Condition 61.1 per cent of a normal, compared with 58.1 per cent on September 1, 1912, and 59.3 per cent on September 1, 1911. The report shows that for the past ten years the indicated crop per acre estimated from condition reports is 25.4 bushels, compared with 25.4 bushels harvested last year and 25.4 bushels in 1911. On the planted area, 104,400,000 acres is estimated the first crop production will be about 2,510,000,000 bushels compared with 2,510,000,000 bushels harvested last year and 2,510,000,000 bushels in 1911.

Spring Wheat—Condition 75.3 per cent of a normal, compared with 74.1 per cent on September 1, 1912, and 74.1 per cent on September 1, 1911. The report shows that for the past ten years the indicated crop per acre estimated from condition reports is 13.0 bushels, compared with 13.0 bushels harvested last year and 13.0 bushels in 1911. On the planted area, 14,400,000 acres is estimated the first crop production will be about 1,872,000,000 bushels compared with 1,872,000,000 bushels harvested last year and 1,872,000,000 bushels in 1911.

Condition in Kansas is given as 10 per cent of a normal, compared with 10 per cent on September 1, 1912, and 10 per cent on September 1, 1911. The report shows that for the past ten years the indicated crop per acre estimated from condition reports is 1.0 bushel, compared with 1.0 bushel harvested last year and 1.0 bushel in 1911. On the planted area, 1,400,000 acres is estimated the first crop production will be about 1,400,000 bushels compared with 1,400,000 bushels harvested last year and 1,400,000 bushels in 1911.

Condition in Texas is given as 10 per cent of a normal, compared with 10 per cent on September 1, 1912, and 10 per cent on September 1, 1911. The report shows that for the past ten years the indicated crop per acre estimated from condition reports is 1.0 bushel, compared with 1.0 bushel harvested last year and 1.0 bushel in 1911. On the planted area, 1,400,000 acres is estimated the first crop production will be about 1,400,000 bushels compared with 1,400,000 bushels harvested last year and 1,400,000 bushels in 1911.

Condition in Oklahoma is given as 10 per cent of a normal, compared with 10 per cent on September 1, 1912, and 10 per cent on September 1, 1911. The report shows that for the past ten years the indicated crop per acre estimated from condition reports is 1.0 bushel, compared with 1.0 bushel harvested last year and 1.0 bushel in 1911. On the planted area, 1,400,000 acres is estimated the first crop production will be about 1,400,000 bushels compared with 1,400,000 bushels harvested last year and 1,400,000 bushels in 1911.

Condition in Missouri is given as 10 per cent of a normal, compared with 10 per cent on September 1, 1912, and 10 per cent on September 1, 1911. The report shows that for the past ten years the indicated crop per acre estimated from condition reports is 1.0 bushel, compared with 1.0 bushel harvested last year and 1.0 bushel in 1911. On the planted area, 1,400,000 acres is estimated the first crop production will be about 1,400,000 bushels compared with 1,400,000 bushels harvested last year and 1,400,000 bushels in 1911.

Condition in Arkansas is given as 10 per cent of a normal, compared with 10 per cent on September 1, 1912, and 10 per cent on September 1, 1911. The report shows that for the past ten years the indicated crop per acre estimated from condition reports is 1.0 bushel, compared with 1.0 bushel harvested last year and 1.0 bushel in 1911. On the planted area, 1,400,000 acres is estimated the first crop production will be about 1,400,000 bushels compared with 1,400,000 bushels harvested last year and 1,400,000 bushels in 1911.

Condition in Louisiana is given as 10 per cent of a normal, compared with 10 per cent on September 1, 1912, and 10 per cent on September 1, 1911. The report shows that for the past ten years the indicated crop per acre estimated from condition reports is 1.0 bushel, compared with 1.0 bushel harvested last year and 1.0 bushel in 1911. On the planted area, 1,400,000 acres is estimated the first crop production will be about 1,400,000 bushels compared with 1,400,000 bushels harvested last year and 1,400,000 bushels in 1911.

Condition in Mississippi is given as 10 per cent of a normal, compared with 10 per cent on September 1, 1912, and 10 per cent on September 1, 1911. The report shows that for the past ten years the indicated crop per acre estimated from condition reports is 1.0 bushel, compared with 1.0 bushel harvested last year and 1.0 bushel in 1911. On the planted area, 1,400,000 acres is estimated the first crop production will be about 1,400,000 bushels compared with 1,400,000 bushels harvested last year and 1,400,000 bushels in 1911.

WHEAT DEFIED  
WEATHER NEWS

Prospects for Plowing Improved—This Had Weakening Effect on the Market. Corn Rallied Late in Day.

Chicago, September 3.—Improved prospects for fall plowing had a weakening effect today on wheat. The government report issued last week showed a decline in the wheat crop, but the market was not affected. The wheat market was steady, with a slight decline in the price of wheat. The corn market was active, with a slight decline in the price of corn. The soybean market was steady, with a slight decline in the price of soybeans.

Some corn leaders declared improved prospects for fall plowing had a weakening effect today on wheat. The government report issued last week showed a decline in the wheat crop, but the market was not affected. The wheat market was steady, with a slight decline in the price of wheat.
